

WHY UPGRADE THE BATTERY SYSTEM

Compaq iPaq 3600 and 3700 series devices are used for both personal and business. User's rely upon their iPaq to help them work and play without boundaries. Original equipment limits use to a couple of hours before a new charge is needed.

Do you:

Use your iPaq more than 2 hours a day?

Send and receive email directly using your iPaq?

Use a networked application?

Need more power for expansion cards?

Play MP3 Music?

Make Voice Recordings?

Take Meeting Notes?

Use GPS?

Work While Traveling?

A battery system upgrade means longer use between charging

***Battery System
Upgrades for the
Compaq iPaq 3600 and
3700 Series***

BATTERY UPGRADES

Original equipment batteries have a useful life of approximately two years. After that you may notice shorter times between charging or slower operation.

The KingRex PGF Battery combined with HyperDrive provides longer periods of use between battery charges and better performance under demanding loads.

Who benefits most from improved battery performance?

Wireless network users

Cellular Modem users

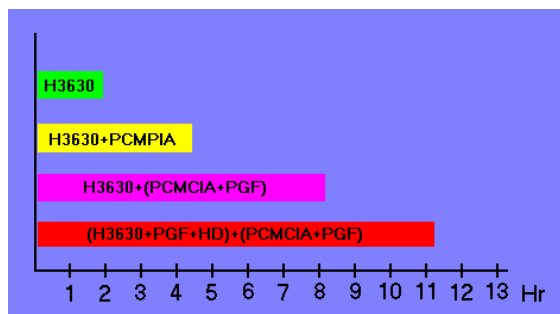

Users who depend on their iPaq for business and personal information storage.

Users of the expansion sleeves that power devices.

Expansion Sleeve

Longer battery life means more on the go productivity

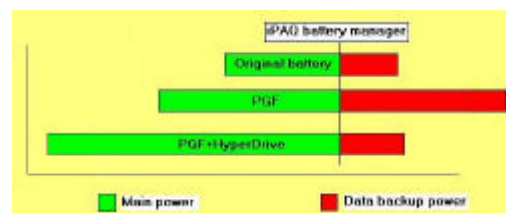

Source: KingRex Technology Co. Ltd, Taiwan ROC

This upgrade applies to the Compaq iPaq 3600 and 3700 series only

THE HYPERDRIVE ADVANTAGE

Applies battery power to user operations.

The chart below shows how the iPaq uses battery power for its two operating modes, 'In Use' and 'Off'

Source: KingRex Technology Co. Ltd, Taiwan ROC

HyperDrive is recommended only for iPaq's whose warranty has expired. Installation of HyperDrive is a hardware change that voids the manufacturers warranty.

AT A COST YOU CAN AFFORD

Installed:

PGF Battery and HyperDrive: \$250.00*

PGF Battery alone: \$209.00*

PGF Lite Battery \$159.00*

Do it yourself:
